SHOE CARE TIP #4

- TOOLS -

Not all shoe brushes have the same purpose. Similar to the way a painter chooses their paint brush, medium and canvas, one has to take as much care when choosing a shoe brush. Moneysworth & Best carries brushes for every type of material. Ensure you are selecting the right type of brush for the job, whether it be to remove surface dirt, to apply polish, to buff polish to a shine, or to brush up nap.

SUEDE SHOE CARE STARTS HERE

1, 2, 3, EASY STEPS.

1 CLEAN

Remove surface dirt with a clean nylon bristled Suede Brush. Use liquid Salt Remover (item #16201) to remove salt stains. Rub a Suede Block to remove marks and shiny spots. Apply Suede Cleaner and gently scrub with the Suede Brush to rid of stains. Always brush in one direction and be gentle as to not damage the nap.

2 POLISH

If your suede's colour has faded, refresh and restore it with Suede Renew. Be sure to accurately colour match first. Once dry, restore texture by brushing up the nap with the Suede Brush.

3 PROTECT

Once clean, protect your suede regularly with Moneysworth & Best's Suede & Nubuck Protector. It will help to repel water, dirt and stains and prolong the life of your footwear.

Be sure to test all products on a small inconspicuous area before applying.

SHOE CARE TIP #12

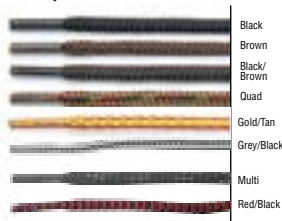

- LACING HIKER BOOTS -

Lacing hiker boots correctly is more sophisticated than one would think. There are various techniques to ensure one achieves the perfect fit. Correct lacing should be taut, but not too tight, from the toe up to the top of the boot or shoe. There shouldn't be any loose areas and the lace should be even and make firm contact with the boot. There are lacing methods to avoid blistering, secure the heel, and keep a secure fit. Ask an expert or utilize internet resources (including video tutorials) on the many techniques available including the "Surgeon's Knot" and "The Heel Lock".

SHOE CARE TIP #22

- SHOE FIT TIP -

Always stand up when trying on footwear and allow for adequate toe room while standing. There should be 3/8" to 1/2" of space between your longest toe and the end of the shoe (approximately a thumbs width). It is best to try shoes on in the afternoon/evening as feet often swell throughout the day.

Be sure to use disposable foot socks when trying on footwear.

SHOE CARE TIP #24

- SAFETY -

Always follow basic safety precautions when working with adhesives. Work in a well ventilated area to avoid breathing in fumes. Read the instructions and caution information thoroughly on the label before using. Replace the cap/lid immediately after use to avoid accidental spillage. Most importantly, be extremely cautious as glue can bond to skin in seconds. Use gloves to avoid any incidents.

See pages 64-66 for a complete line of adhesives.
